

Choosing the right digital photo frame ?

Digital photo frames are decor items that seamlessly blend into your interior while allowing you to enjoy your best photos and memories. Their stylish appearance is a strong selling point, but the great thing about digital photo frames is the links they forge with our close ones.

For example, you can send one to your grandparents so they can keep up with what's going on in the family and enjoy the precious memories displayed.

There are, of course, different types of digital photo frames. The AgfaPhoto team is here to help you choose a frame that meets all your needs !

1- Why invest in a digital photo frame ?

Everyone loves displaying those special moments in life, whether in a classic photo frame on your desk, stuck on the fridge door or hung on a wall. Photos are daily reminders of our fond memories. The great news is advances in technology have changed how we enjoy our photos, thanks to the arrival of the digital photo frame !

No need to um and ah over which holiday or family snaps to frame - thanks to the digital photo frame, you can scroll through all your favourite shots ! They're easy to use - upload your photos to the digital photo frame via a USB cable, SD card or an internet connection.

The digital frame then presents them as a slideshow. You can choose how long each photo is displayed and (depending on the model) select different transition effects.

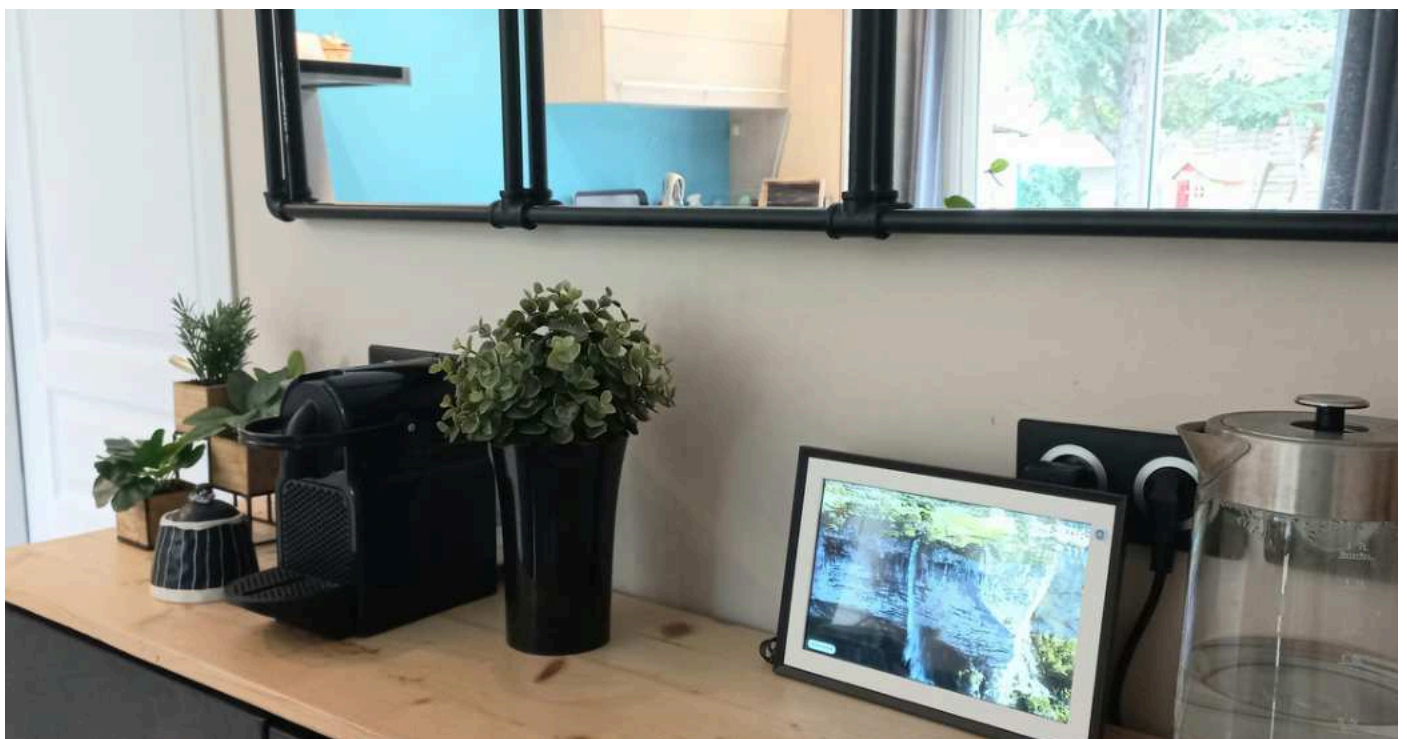

The digital photo frame: an ideal connected home decor object

Digital photo frames have become family must-haves. Instantly sharing our photos with loved ones who live far away has been a game-changer! What better way to stay in touch? Grandparents will love a digital photo frame; they can virtually join you on holiday or see what the kids have been up to.

Digital photo frames are also an excellent way to convey a visual message: for example, you can take a celebratory photo to wish someone Happy Birthday or show someone how much you love them !

What's more, you'll now find digital photo frames with a video function. Film your little one's first steps, a family bike ride or your trip to a stunning château, and then send the video to your parents' digital frame !

As well as preserving your precious memories, digital photo frames are attractive decor items. Some also have additional functions, such as time or weather forecast displays.

The digital photo frame: a must-have for family and friends

Thanks to digital photo frames, you can share photos instantly via your smartphone from anywhere in the world. Shoot a stunning landscape or a great group photo and upload your snap to your friends' or family's frame !

The frame just needs to be turned on so the screen lights up and hey presto ! your snap will appear in the slideshow. You can even add a short personal message to your snap !

2- What are the different features in connected photo frames ?

There are of course various types of digital photo frames: at AgfaPhoto, we have 5 models with different features.

Screen size and frame design

When choosing a digital photo frame, the first thing to consider is the size. These frames have screens, so they're sized in inches. AgfaPhoto has 7-inch (17.78 cm), 10-inch (25.4cm), 15.6-inch (39.62 cm) and 17-inch models. The latter is equivalent to 43 cm for a frame that will show off photos in a large format without compromising on sharp image quality !

What's more, digital photo frames can be placed on a piece of furniture or hung on a wall, just like a classic wall-mounted photo! Digital photo frame designs also come in a range of styles, just like normal frames. Choose between slim or wide moulding around the screen to perfectly show off your photos.

Uploading photos to a frame

To display shots on a digital photo frame, they need to be uploaded from a storage medium (such as an SD card or USB drive) or a smartphone.

Some models require a simple USB cable or a Micro SD card to transfer the photos you've selected.

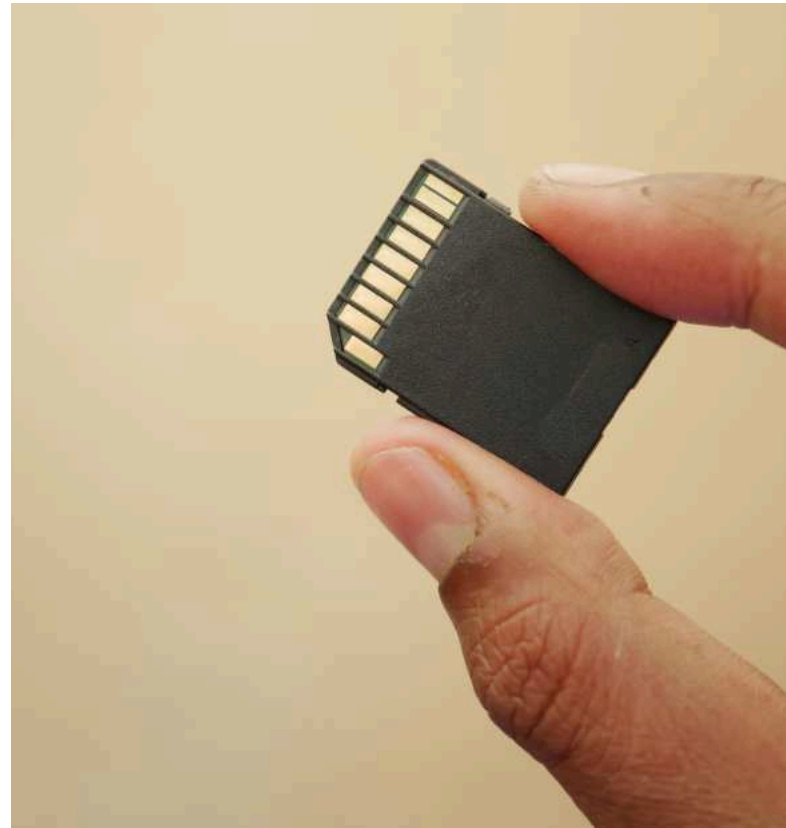

Other frames are connected and can receive photos via a Wi-Fi connection. When the photo frame is turned on, it can be connected to the internet and receive photos sent from all over the world. This same internet connection will also allow you to display the day's weather forecast on your screen !

Digital photo frame storage capacity

If you want to admire lots of photos, you must choose a digital photo frame with an adequate storage capacity.

The good news is most models have an SD card reader, so you're not limited to its internal storage capacity. The storage capacity will vary from one frame to another: you can find models with an 8MB internal memory that can be extended to 32 GB or frames with an internal memory of 32 GB.

So if you tend to take and display lots of photos every day or want to immortalize a long trip, opt for a large storage capacity. That way, you won't have to worry about picking and choosing between photos and will have long slideshows that you won't tire of watching!

Screen quality

The great thing about digital photo frames is you can admire photos without fear of them getting damaged. But this also means you'll need to choose the right type of screen.

Some models have a touchscreen so you can manually scroll through the photos. AgfaPhoto's connected screens are LCD screens with a resolution that will enhance all your shots. There are different degrees of resolution: our 15.6" screen, for example, has a 1920x1080 resolution so you can view your photos and videos from any angle.

The various extras

Digital photo frames also come with a range of extras such as being able to link them to a smartphone app, connecting to the internet or adjusting your photos' scroll rate. Some screens display the time and weather. You'll also find models with an automatic on/off function, so you program the time you want the photo frame to switch off and limit its energy consumption.

3- Choosing your AgfaPhoto digital photo frame

AgfaPhoto has a range of digital photo frames that are easy to use and handle. You can choose from several screen sizes, touchscreens and storage capacities to suit you or your family's needs.

To help you choose a model that ticks all the boxes, here's a rundown of AgfaPhoto's frames !

Connected digital photo frames with realistic screens

AgfaPhoto has designed three flagship connected frames that look good and have all the necessary technical specs: the Realiview APF700WIFI, the Realiview APF1000WIFI, the Realiview APF1560WIFI and the Realiview APF1700WIFI.

THE REALIVIEW APF1000WIFI: THE STANDARD WI-FI DIGITAL FRAME, PERFECT FOR VIEWING YOUR MEMORIES

The Realiview APF1000WIFI has a 10" touchscreen (25.4 cm) and can be easily placed on a piece of furniture. It has an internal storage of 32 GB and also comes with a smartphone app (FRAMEO) so you can receive photos and videos from anywhere in the world alongside short messages from your loved ones !

THE REALIVIEW APF1560WIFI: THE CONNECTED PHOTO FRAME THAT WILL ENHANCE YOUR INTERIOR DECOR

The Realiview APF1560WIFI has a 15.6" (38.1cm) touchscreen for optimal image quality that will enhance all your photos. It has 32GB internal storage plus USB ports so you can increase its storage capacity. This digital photo frame can also receive photos and videos from a smartphone !

THE REALVIEW APF1700WIFI: A LARGE FORMAT CONNECTED FRAME TO DISPLAY YOUR FINEST PHOTOS

To view photos in a large format, then opt for the Realiview APF1700WIFI digital photo frame with its 17" (48.18 cm) touchscreen! Just like the other Realiview models, this digital frame has a Wi-Fi connection, so you can display your photos and keep an eye on the time and weather forecast !

THE REALVIEW APF700WIFI 7-INCH DIGITAL CONNECTED PHOTO FRAME: A TOUCHSCREEN TO SHARE PHOTOS WITH YOUR FAMILY WHEREVER YOU ARE.

With its 7-inch (17.78 cm) screen, the Realiview APF700 Wi-Fi lets you receive photos from your loved ones wherever they are! Thanks to its Wi-Fi connection, your close ones can send photos directly to your screen from all corners of the globe. They can even add short messages to their photos and videos !

4- Opt for a connected photo frame to immediately enjoy photos

THE REALIVIEW APF700 DIGITAL PHOTO FRAME, 7 INCHES: A SIMPLE, AFFORDABLE DEVICE

The Realiview APF700 digital photo frame has a 7-inch (17.78 cm) screen. It measures 205x143x23mm making it a handy size to display on a piece of furniture or hang on the wall. The 7-inch LED screen ensures a sharp resolution so you won't miss any details.

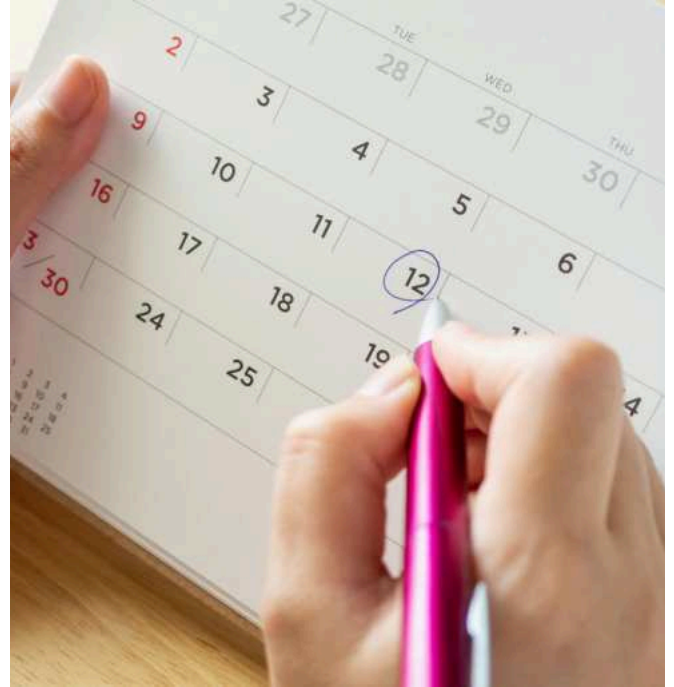

It has 8MB of internal storage and an SD card reader so you extend its memory to 32GB and import even more photos. You can upload photos in JPEG and BMP format.

This easy-to-use model lets you choose how long the photo is displayed and have fun with a dozen transition effects! Finally, it has an energy-saving, programmable on/off function.

THE REALVIEW APF1000, 10-INCH: THE AGFAPHOTO CONNECTED PHOTO FRAME THAT WILL SEAMLESSLY BLEND IN WITH YOUR DECOR

The AgfaPhoto 10-inch connected photo frame is a bigger version of the Realiview APF700. With its 25.4 cm screen, you can enjoy viewing your photos in a large format. This photo frame also has nifty features such as a clock and calendar. So you can keep on top of your diary while happily viewing your photos. You can also set the display time for your photos.

The Realiview APF1000 is a frame that adapts to your viewing needs thanks to its automatic on/off function.

It has integrated USB and memory card ports so you can increase your digital photo frame's storage up to 32GB.

5- Our connected digital photo frames combine sleek designs with cutting-edge tech

AgfaPhoto has designed digital photo frames that you can display on a piece of furniture or hang on your living room wall, just like a classic photo frame.

Available in several sizes ranging from 7 to 17 inches (from 17.78 cm to 43 cm), the Realiview digital photo frames have an integrated Wi-Fi connection so you can receive photos from all over the world. If your digital photo frame is switched on and your loved ones want to send you a snap or video, their latest photos will automatically appear in your slideshow.

They can also send you a short message with each photo! To make it even easier to send photos from all over the globe, your family or friends just need to install the iOS and Android-compatible FRAMEO app on their phones. This free app is easy to use and completely secure: whatever their age, every family member can choose the photos they want to share with friends or relatives.

The other plus is all the frames, regardless of their size can display the time and weather. So you get a lovely addition to your home decor that's as elegant as it is practical! For example, the Realiview APF1000WIFI is a small but powerful connected frame, the Realiview APF1560WIFI is the perfect mid-range frame to view your photos from all angles while the Realiview APF1700WIFI is the go-to for life-size photos!

You just need to choose the digital photo frame that suits your needs and your tastes. Whether you want a frame to offer as a gift or to display in your home, you're sure to find the perfect one in our catalogue. And, of course, if you prefer printed-out photos, check out the AgfaPhoto portable printer range. These easy-to-use devices produce high-quality prints in seconds. So why not set up your digital photo frame next to a classic 10x15cm photo or even a credit card-sized one ?

À vous de choisir le modèle de cadre photo numérique qui répond le plus à vos envies et à vos besoins. Que vous souhaitiez choisir un modèle à offrir ou un cadre à afficher dans votre salon, vous trouverez dans notre catalogue votre référence de prédilection. Si bien sûr, vous appréciez aussi l'authenticité d'un cliché imprimé, découvrez également les imprimantes photo portables AgfaPhoto. Ces appareils faciles d'utilisation vous permettront de réaliser des tirages de grande qualité en quelques secondes : aux côtés de votre cadre photo numérique, vous pourrez ainsi afficher des photos au format traditionnel 10x15cm ou même au format carte de crédit !
